

1.2 School Safety – Appropriate Security Devices in Buildings

Legal Standard

The district includes the appropriate security devices in the design of new buildings as well as in modernized buildings. [EC 32020, 32211, 35294-35294.9, 39670-39675]

Progress on Recommendations and Recovery Steps

- 1. All plans for modernization of the district’s facilities and for new construction of schools include appropriate security systems in the designs.
- 2. All elements of this standard are fully implemented, are being sustained with high quality, are being refined, and have a process for ongoing evaluation. This standard has been sustained for three years.

1.3 School Safety – Plan for Protection of People and Property

Legal Standard

Demonstrate that a plan of security has been developed which includes adequate measures of safety and protection of people and property. [EC 32020, 32211, 35294-35294.9, 39670-39675]

Consent Decree Stipulation

This standard was identified in the Consent Decree in the action *Serna v Eastin*, Case No. BC 174282, as needing to reach a rating of 8 to be deemed compliant.

Additional related stipulations (Section 14) include the development of a district-wide security plan, the establishment of a district security committee that reviews implementation of the security plan, providing an annual public hearing before the board, the encouragement of voluntary participation of parents in school security patrols and training for parents.

Progress on Recommendations and Recovery Steps

1. Security alarms are in place in the district's schools. The last two sites, Roosevelt Middle School and Compton High School were being wired for a new security system during the previous six-month visit in February 2002. The last school was 97% complete at the team's visit in June. Alarms have been installed in the 56 portable classrooms the district acquired to implement the full-day kindergarten and primary program beginning in the 2001-2002 school year. The district alarm system utilizes door contacts and motion sensors. The security alarms are monitored by Advance Alarm, the security company that installed and monitors the system. The company notifies district Police Services whenever an alarm is triggered. The district reports a higher apprehension rate of perpetrators of vandalism and property crimes. The number of property crimes in the district has decreased.
2. As reported in earlier progress reports, the district has a district-wide security plan, and the district-wide safety committee continues to meet to review school safety issues. Parent volunteers continue to be solicited to participate on the district and site committees. School site safety committees continue to determine safety concerns and recommend remedial action to the school administrator and the district office. Documentation of committee meetings and agendas are verified during school site visits by district administration and a FCMAT representative.
3. Other security initiatives reported in previous progress reports continue. Several school sites have video cameras affixed in key spots on campus. The district has reduced the number of facility use permits for community use, and has closed its campuses to the general public on weekends and overnight beginning at 9:00 p.m. School perimeter gates are locked, and perimeter fencing at many sites has reduced the number of incidences of property damage on school campuses. Signs are posted on each campus warning against trespassing, and directing visitors to report to the administration office.

- The district has reestablished its participation in the WE-TIP program, an anonymous telephone tip line for community members to use to report property crimes against the district.

1.5 School Safety – Documented Process for Key Control

Professional Standard

The district has a documented process for the issuance of master and sub-master keys. A district-wide standardized process for the issuance of keys to employees must be followed by all district administrators.

Progress on Recommendations and Recovery Steps

1. The master key security system is being maintained. The district has a locksmith repin the locks when keys are reported lost. The district has initiated a policy to charge the employee for the replacement of lost keys and the repinning or reconfiguring of the lock mechanism. Greater accountability is being maintained in the issuance of master and sub-master keys.
2. Employees who are issued keys sign a Key Receipt and Agreement form that is placed in the employee’s permanent file. The \$50.00 minimum charge to the employee for lost keys should be included on the Key Receipt and Agreement form so that employees are aware in advance of the financial consequences of losing keys. The district has developed a sample memo for employees to report lost keys and the circumstances under which they were lost.
3. Board Policy 3517(a) delineates the conditions for the issuance of keys. An amendment to the policy was approved in July 1999, limiting the issuance of master keys to the site administrator, vice-principal and plant manager, and assessing a minimum fee of \$50 for the replacement of lost keys and core repinning of locks.

1.6 School Safety – Monitoring of Bus Loading/Unloading Areas for Safety

Professional Standard

Bus loading and unloading areas, delivery areas, and parking and parent loading/unloading areas are monitored on a regular basis to ensure the safety of the students, staff and community. Students, employees and the public should feel safe at all times on school premises.

Consent Decree Stipulation

This standard was identified in the Consent Decree in the action *Serna v Eastin*, Case No. BC 174282, as needing to reach a rating of 8 to be deemed compliant.

Progress on Recommendations and Recovery Steps

1. The district has contracted its student busing services to an outside vendor since September 2000. The bus routes and pick up points were established with the new transportation contractor. The district also began enforcing the walking distances included in district policy which reduced the student ridership and eliminated some bus pickup sites.
2. The district has worked with the city to conduct traffic studies at various school sites to assess any safety hazards in school traffic patterns. Remedies have included the installation of flashing lights, crosswalks, and wider sidewalks in some school areas. The district has also assessed the bus loading areas at the various school sites and implemented changes for improvement at problematic sites. The bus loading and unloading areas at school sites continue to be monitored by site security “yellow jackets” on a regular basis to ensure student safety. Additional crossing guards have been hired by the district at some sites. Signs indicating bus loading areas and signs directing vehicular traffic have been placed at schools. Curbs have been painted and bus loading areas repaved. The district’s relationship with the city of Compton has continued to be positive under the new city administration.
3. As reported in earlier six-month progress reports, the district facilities committee examined school attendance boundaries. The district had hoped to open a new elementary school in September 2001 with modular buildings, which would have prompted the establishment of new school attendance boundaries in the area. However, the district did not receive new construction funds from the state. The district governing board has approved a Certificate of Participation (COP) for approximately \$19 million to build William Jefferson Clinton Elementary School behind Dominguez High School. The school is scheduled to be open for students in January 2003. The district will adjust its school attendance boundaries in the area and is hopeful that the boundary revisions will enable students to attend their neighborhood school, reducing the need to transport students to school in another neighborhood.
4. The architectural plans for new schools in the district include designs for new bus loading/unloading points. Student safety has been a consideration in the development of the designs.

1.7 School Safety – Installation and Operation of Outside Security Lighting

Professional Standard

Outside lighting is properly placed and monitored on a regular basis to ensure the operability/adequacy of such lighting to ensure safety while activities are in progress in the evening hours. Outside lighting should provide sufficient illumination to allow for the safe passage of students and the public during after hour activities. Lighting should also provide security personnel with sufficient illumination to observe any illegal activities on campus.

Consent Decree Stipulation

This standard was identified in the Consent Decree in the action *Serna v Eastin*, Case No. BC 174282, as needing to reach a rating of 8 to be deemed compliant.

Progress on Recommendations and Recovery Steps

1. All campuses have outside security lights. Energy conservation practices are being implemented. Many of the lights and systems have been changed to be more energy efficient. A retrofit of lights has taken place at Davis Middle School, Roosevelt Middle School, Emerson Elementary and Vanguard Middle School. Flood lights have been installed at Mayo Elementary. In the last school year the district set aside \$470,000 of deferred maintenance funds to retrofit lights at seven school sites. The district's modernization projects will continue to address this standard when state funds are provided.

The mobile repair teams are assigned to school sites on a rotational basis and replace lights and light fixtures as needed. The site staff monitors lighting fixtures and reports fixtures that need repair. The district included improvements to its outdoor security lights for its campuses in its modernization plans.

2. As indicated in previous six-month progress reports, the district has reduced the number of evening hour activities held on school campuses, and has reduced the number of facility use permits it grants to minimize after hours traffic on campus.
3. Periodic, unannounced school visits continue to be conducted by a FCMAT representative to monitor compliance with the stipulations.

1.8 School Safety – Graffiti and Vandalism Abatement Plan

Professional Standard

The district has a graffiti and vandalism abatement plan. The district should have a written graffiti and abatement plan that is followed by all district employees. The district provides district employees with sufficient resources to meet the requirements of the abatement plan.

Consent Decree Stipulation

This standard was identified in the Consent Decree in the action *Serna v Eastin*, Case No. BC 174282, as needing to reach a rating of 8 to be deemed compliant.

Additional related stipulations (Section 16) include that all schools are clean and free from graffiti, that unusable playground equipment is removed or repaired, that schools are free of litter and that a community service program of five hours per semester has been developed for students.

Progress on Recommendations and Recovery Steps

1. The district's graffiti abatement program is one of immediate removal and remains a major district priority. Site security personnel, or "yellow jackets," are assigned to patrol specific sections or "hot spots" on the campus to supervise graffiti-prone areas. The monitoring by on-site staff remains key to eliminating graffiti.
2. As reported in previous six-month reports, the district has assigned one district maintenance employee to remove graffiti at district schools, visiting each high school every day. In addition, the school custodial staffs have targeted graffiti as a priority for removal every day. Site custodians handle the small paint jobs, and call the district for help on the big paint jobs, over eight feet. School sites are provided with paint in matching colors, to avoid the patchwork appearance often caused by graffiti removal.
3. The district has established an emergency "hot line" (extension 55377) for the reporting of graffiti that the school custodians cannot handle on their own. The district's expected response time to the site is 15 minutes.
4. Paints and cleaning materials are made available to the school sites to remove graffiti immediately. Color matching has been addressed with employees, to minimize the patchwork effect of painting over graffiti. Staff are urged to take more care to eliminate sloppy, dripping paint. Staff are being more closely monitored to improve accountability. Non-productive employees are being provided training to improve, reassigned, or evaluated out if necessary.
5. Periodic, unannounced school visits continue to be conducted by a FCMAT representative to monitor compliance with the stipulations. School campuses are inspected regularly and appear to be relatively free from graffiti. The elementary and middle school campuses are clean and graffiti-free. The high school campuses remain a constant challenge for staff.

6. The district is proposing changes to the high school graduation requirements to include a required one-quarter credit of community service for students to meet prior to graduation. The course requirement is the equivalent of 45 hours. In other community service activities, students are engaged in campus beautification projects, often initiated by student government groups, on the various school campuses.

1.9 School Safety – School Site Emergency Procedures Plan

Legal Standard

Each public agency is required to have on file written plans describing procedures to be employed in case of emergency. [EC 32000-32004, 32040, 35295-35297, 38132, 46390-46392, 49505, GC 3100, 8607]

Consent Decree Stipulation

This standard was identified in the Consent Decree in the action *Serna v Eastin*, Case No. BC 174282, as needing to reach a rating of 8 to be deemed compliant.

Additional related stipulations (Section 15) include that each school site has a fire warning system by September 1, 1999, that each school site has earthquake emergency procedure system, that fire drills and earthquake drop procedures are conducted according to education code, that written logs of fire and earthquake drop drills are maintained, that the written logs are available for public inspection and that the State Administrator conduct periodic reviews to ensure the log is being maintained.

Progress on Recommendations and Recovery Steps

1. As reported in earlier six-month progress reports, written emergency plans are available at the school sites for earthquakes and other disasters. School site safety plans include fire evacuation plans, bomb threats or disturbances, and staff assignments in cases of emergencies. The availability of the school's site plans are checked during site visitations by district personnel and by FCMAT members.
2. Schools are required to conduct emergency drills according to Education Code and to maintain records of drills conducted. This process is verified for each site. The school's records are reviewed by district personnel and by FCMAT members. Periodic, unannounced site visits are conducted by a FCMAT representative to review the written logs of the scheduled drills held on the campus.
3. All schools have a fire alarm system in place. Twenty-three sites have a fully supervised, monitored system. Thirteen schools use a bell system and are awaiting conversion to a strobe fire alarm system. The district has conducted on-site fire alarm drills with the fire department to test the schools' systems. District office staff, school police and plant staff participate in the monitoring of these drills.
4. The district is working with the city to establish a district level disaster response team to operate out of a centrally located emergency operations center. The district has established the district police department as the command center. The district is identifying the special skills of staff. The district is working with the city to identify school sites to be used as temporary shelters. School sites continue to maintain their emergency disaster kits. Training is being conducted for district staff on how to handle emergencies.

- The district responds to site emergencies that are called in to the district office on the emergency hot line as rapidly as possible. District staff indicated that broken windows are replaced within 24 hours and that broken toilets are responded to within two hours.

1.12 School Safety – Inspection and Correction of Unsafe Conditions

Legal Standard

Building examinations are performed, and required actions are taken by the governing board upon report of unsafe conditions. [EC 173679(a)]

Consent Decree Stipulation

This standard was identified in the Consent Decree in the action *Serna v Eastin*, Case No. BC 174282, as needing to reach a rating of 8 to be deemed compliant.

Additional related stipulations (Sections 9 and 18) include replacing boarded up windows, replacing broken windows within 72 hours, affixing a date and time to temporary material placed on broken windows; establishing site committees to inventory and prioritize repair and maintenance needs, and reporting to the State Administrator and board at least once a semester.

Progress on Recommendations and Recovery Steps

1. FCMAT team members and representatives of the American Civil Liberties Union continue to conduct periodic, random site inspections of district facilities. In addition, a FCMAT representative and district personnel conduct redundant, periodic, unannounced school site visitations on a monthly basis to monitor conditions of school facilities. Schools receive a letter grade based on a criteria checklist. Letter grades may change at each site inspection. Several members of the district's governing board also conduct site visitations on a weekly basis.

FCMAT site inspection reports continue to be shared with the ACLU, the State Administrator, and the Facilities Division. Reports of maintenance actions taken to remedy any deficiencies identified during inspections are reported back to the sites and the FCMAT inspector. Follow-up inspections are conducted by the FCMAT inspector to check the completed work. The district continues to comply with the speedy replacement of broken windows.

2. As reported in previous six-month progress reports, the district continues to utilize a maintenance request flow chart and forms to track all maintenance requests from the sites. The district has established a five-day completion timeline to complete the requested maintenance. If a request is complex and will require more than two days to complete, the request is assigned to the facilities division as a project, and sites are informed that the five-day timeline cannot be met, with an explanation of the planned date of completion. Logs of the maintenance requests are kept for each school. Individual sites receive copies of all responses to the requests generated by the site. The district has also established regular maintenance schedules for recurring work, such as tree trimming. The district is following the Facilities Master Plan in scheduling work for roofing, upgrading restrooms, retrofitting lighting, redoing asphalt, etc.
3. The district continues to utilize the two mobile maintenance teams that were established earlier in the year. The teams are assigned to a school site for 7-10 days at a time to address school site repairs and maintenance. Sites are inspected ahead of the

time the mobile team is scheduled to arrive to identify specific site needs. The mobile maintenance team lead also holds a meeting with the principal and plant manager upon arrival at the site.

4. The maintenance department continues to immediately address emergency calls to the maintenance hot line (extension 55377). A memo developed in May 2001 identifies the types of situations that are emergencies, such as lack of heat, roof leaks, broken pipes, broken windows, odors, inoperable locks, inoperable lights, main line stoppage, broken or lost keys, bells or alarms not working, serious graffiti or vandalism, or fire.
5. The maintenance department handles any deficiency reported on the FCMAT site inspection reporting forms right away. The department has established new criteria for determining the emergency status of a project. Emergency projects become the new priority. The mobile maintenance teams are used to address any site inspection deficiencies that surface in an ACLU inspection.
6. Plant managers have been directed to conduct electrical inspections of their site on a monthly basis and to report in writing, any potentially hazardous electrical condition. A form for the documentation of these monthly reviews was developed, and records of the monthly reports from the sites are being maintained. Follow-up work conducted on any reported electrical condition is tracked for each site. Records of these reports were shared with the study team.
7. Plant managers are required to report the monthly attendance of their staff to the district office. Both the staff attendance form and the electrical inspection form are due to the district office by the fifth of the month.
8. Monthly training meetings are held with the plant managers on district procedures and/or on improving employee skills, such as the proper handling of cleaning chemicals. Plant managers are expected to train their site staff on the procedures and/or techniques learned.
9. The district conducted a workshop with the governing board on the district's Facilities Master Plan and Implementation Plan in January 2002. Staff reported that the board was positive in their response to the documents and have been very supportive in addressing the facilities needs of the district. The board is considering placing a General Obligation Bond (GOB) on the ballot in November, and has approved a COP for approximately \$19 million to build a new elementary school near Dominguez High School. The new school, William Jefferson Clinton Elementary School, will be ready for students in January 2003.
10. Board subcommittees have been organized in several school operational areas. The board president chairs the facilities area, and he, the superintendent, a parent, a teacher and the principal walk two school sites each week to identify any facilities needs at the site. The board has been supportive of facilities project requests. Facilities updates are provided at the monthly board meetings.

11. The district will be assigning a district facilities coordinator to conduct in-house site inspections to assess the condition of site facilities. This is a proactive move to include the site inspections and grade ratings as an internal district operational procedure so as not to rely on an external inspector to drive the district's response for repair and maintenance of district facilities. This will make the district's response to facilities needs more proactive and less reactive.

1.14 School Safety – Sanitation is Maintained and Fire Hazards are Corrected

Legal Standard

Sanitary, neat and clean conditions of the school premises exist and the premises are free from conditions that would create a fire hazard. [CCR Title 5 §633]

Consent Decree Stipulation

This standard was identified in the Consent Decree in the action *Serna v Eastin*, Case No. BC 174282, as needing to reach a rating of 8 to be deemed compliant.

Additional related stipulations (Sections 16 and 18) include that all schools are clean and free from graffiti, that unusable playground equipment is removed or repaired, that schools are free of litter and that a community service program of five hours per semester has been developed for students; other stipulations include establishing site committees to inventory and prioritize repair and maintenance needs, and reporting to the State Administrator and board at least once a semester.

Progress on Recommendations and Recovery Steps

1. Random, unannounced site inspections continue to keep all staff focused on maintaining the cleanliness of the school sites. The increased attention given to improving facilities and site cleanliness has resulted in cleaner campuses. Principals are required to inspect student restrooms three times a day and to take action to remedy any problems. Daily inspections by site principals have also improved campus cleanliness.
2. A FCMAT site inspection checklist is used in the site inspection process, and a letter grade is given to a school based on the number of checklist criteria met. The maintenance department handles any deficiency reported on the site inspection reporting forms right away. Two mobile maintenance teams have been established to do routine maintenance at school sites. The teams are assigned to a school site for approximately 7-10 days. Sites are inspected ahead of the time the mobile team is scheduled to arrive to identify specific site needs. The mobile maintenance team lead also holds a meeting with the principal and plant manager upon arrival at the site.
3. Sites are free from fire hazards. Any hazardous conditions have already been addressed by the district. If a random site inspection turns up any potential new hazard, it is addressed by the district right away. All schools have an operational fire alarm system in place as discussed in Standard 1.9.
4. Custodial staffs receive structured monthly training to improve site safety and cleanliness, and are directed to keep storage areas clean and exits free of obstructions. All doors that might constitute a safety hazard are being changed. Training workshops are being conducted in collaboration with the district's Risk Manager. The district continues to maintain its emphasis on safety and cleanliness.

5. The maintenance department is working with the site plant managers to structure the work day of the site custodians and grounds workers. Sample schedules of typical work assignments have been developed to help the plant managers better direct and monitor the work of their staff.
6. As reported in earlier six-month progress reports, a district maintenance employee has been assigned to remove graffiti at district schools, and makes an inspection of each high school every day. The district has assigned an additional classified employee to each of the three high schools to be responsible for landscaping and grounds at their site. The district conducts regular meetings with site principals and plant managers in attendance together to address cleanliness issues.
7. School site safety committees continue to make site inspections, and monitor facilities needs at the school. Site inspections conducted by a FCMAT representative, verifies committee agendas and meeting minutes. The board president, superintendent, a parent, a teacher and the site principal visit two school sites each week to inspect the facilities and identify facilities needs.
8. Both classified and certificated staff remain responsible for addressing the daily removal of litter. Students at some schools also participate in school cleanliness activities as part of a community service emphasis.

1.15 School Safety – Injury/Illness Prevention Program Inspections Are Done

Legal Standard

The Injury and Illness Prevention Program (IIPP) requires periodic inspections of facilities to identify conditions. [CCR Title 8 §3203]

Progress on Recommendations and Recovery Steps

1. Campus sites are being regularly inspected to assess the condition of the grounds and facilities. Board members, plant managers, district staff, and an external FCMAT inspector conduct site inspections. Any identified deficient conditions are addressed appropriately.
2. All elements of the standard are fully implemented, are being sustained with high quality, are being refined, and have a process for ongoing evaluation.

1.16 School Safety – Injury/Illness Prevention Program Inspections Are Done

Legal Standard

Appropriate fire extinguishers exist in each building and current inspection information is available. [CCR Title 8 §1922(a)]

Progress on Recommendations and Recovery Steps

1. The district has placed fire extinguishers in district facilities as required by code. The district has a fire hazard contract with a vendor to inspect all fire extinguishers in district facilities every six months and to service extinguishers that require servicing. Reports from the contractor are kept on file. The mobile maintenance trucks are also equipped with fire extinguishers.
2. All elements of the standard are fully and substantially implemented.

1.17 School Safety – All Exits are Free of Obstructions

Legal Standard

All exits are free of obstructions. [CCR Title 8 §3219]

Consent Decree Stipulation

This standard was identified in the Consent Decree in the action Serna v Eastin, Case No. BC 174282, as needing to reach a rating of 8 to be deemed compliant.

Progress on Recommendations and Recovery Steps

1. Random, unannounced site inspections continue to be conducted to monitor the sites. The continual focus on site inspections has helped to ensure that established procedures are being implemented, and that school campuses are being kept clean with no potential safety hazards.
2. The district reports that all exit doors are free of obstructions. All doors that might constitute a safety hazard are being changed. Hazardous conditions have been addressed by the district. If a random site inspection turns up any potential new hazard, it is addressed by the district right away. All schools have an operational fire alarm system in place as discussed in Standard 1.9.
3. Custodial staffs receive structured monthly training to improve site safety and cleanliness. Staff has been directed to keep storage areas clean and exits free of obstructions.
4. Intrusion alarms at school sites have improved security of district property. The district’s Police Services responds well. Incidents of break-ins have decreased. Security efforts by site staff, such as checking locked doors and windows, have increased.
5. Illuminated exit signs have been placed at exit doors in gyms, auditoriums and cafeterias. Exit signs have been placed at both a high level and at knee-high level in case smoke forces evacuees to crawl along the floor toward the exits.

1.18 School Safety – Plan for Prevention of Campus Crime and Violence

Legal Standard

A comprehensive school safety plan exists for the prevention of campus crime and violence. [EC 35294-35294.9]

Progress on Recommendations and Recovery Steps

1. The district has updated its school safety plan. School sites have safety plans, patterned on the district's safety plan, available at their sites. All elements of the standard are fully implemented, are being sustained with high quality, are being refined, and have a process for ongoing evaluation. This standard has been sustained for three years.

1.21 School Safety – Compliance with Federal AHERA Laws

Legal Standard

All asbestos inspection and asbestos work completed in the US is performed by Asbestos Hazard Emergency Response Act (AHERA) accredited individuals. [EC 49410.5, CFR Part 763]

Progress on Recommendations and Recovery Steps

1. All asbestos work is performed by AHERA accredited individuals. Facilities known to have asbestos still present are inspected every six months by a contracted AHERA accredited vendor. The district has recently reviewed and renegotiated the contract with the vendor, ENCORP Environmental. Training for district staff continues to be provided by the vendor. Documents were provided to support the inspections and training activities.
2. Asbestos is removed from district facilities as funds are available to remove them. Modernization plans address the removal of asbestos. The district’s modernization projects have been approved and are on the list awaiting state facilities modernization funds.

1.22 School Safety – Playground Equipment is Inspected and Safe

Legal Standard

All playground equipment meets safety code regulations and is inspected in a timely fashion as to ensure the safety of the students. [EC 44807, GC 810-996.6, H&SC 24450 Chapter 4.5, 115725-115750, PRC 5411, CCR Title 5 §5552]

Progress on Recommendations and Recovery Steps

1. The playground equipment at fourteen elementary school sites has been replaced or updated.
2. All elements of the standard are fully and substantially implemented. This standard has been sustained for three years.

Standard Implemented: Fully Implemented – Sustained

1.23 School Safety – Safety of Boilers and Fired Pressure Vessels

Legal Standard

Safe work practices exist with regards to boiler and fired pressure vessels. [CCR Title 8 §782]

Progress on Recommendations and Recovery Steps

1. The district employs a full-time boiler technician who maintains all district boilers and pressure equipment. The district boiler technician has established a routine schedule for inspection and adjustment of the boilers at the sites. District maintenance staff are being cross trained on the boiler systems and pressure gauges. New law requires pressure equipment to be measured in BTUs. ENCORP Environmental is assisting the district with complying with the new requirements and the training of staff. Site staff do not make adjustments to the boilers although they are responsible for keeping the boiler rooms clean.
2. Some boilers in the district have been removed, and four boiler systems have been upgraded. All boilers are planned to be removed as part of the district’s modernization projects plans.

1.26 School Safety – Conduct of Periodic Safety Training for Employees

Professional Standard

The district conducts periodic safety training for employees. District employees should receive periodic training on the safety procedures of the district.

Progress on Recommendations and Recovery Steps

1. The district continues to implement its extensive training program for its classified site and district employees. Weekly training meetings are conducted for district M&O staff. The district's maintenance department conducts mandatory monthly training meetings with site plant managers to provide training on district procedures and to improve the work skills of site employees. Plant managers are expected to provide subsequent training to site custodians and grounds workers at their site. Transportation bus drivers also attend monthly meetings regarding safety training.
2. Training activities provide a communications opportunity for site staff to share concerns and issues with the district staff. Good two-way communication between the district and the sites is being maintained. Attendance of plant managers at monthly training sessions is monitored. Principals of non-attending plant managers receive a memo from the superintendent about the lack of attendance.
3. ENCORP, in concert with the district's risk manager, provides continual training to principals and staff. Subject matter includes health and safety issues such as dealing with the hazardous materials of asbestos, lead, chemicals, and issues that affect indoor air quality. The three-year AHERA inspection has recently been completed and the information is being disseminated to all employees. Other training includes workshops on Blood-borne Pathogens, Child Abuse Identification and Reporting, Diversity Awareness, FRISK evaluation training, Sexual Harassment, Substance-Abuse, Workers Compensation, etc. Documentation of types of training provided and sign-in lists of attendees were provided for the study team to review.
4. The district's Human Resources and Employee Development division maintains records of dates of employee attendance and ensures that employees meet mandated training requirements.

1.27 School Safety – Conduct of First Aid Training for School Site Personnel

Professional Standard

The district should conduct periodic first aid training for employees assigned to school sites.

Progress on Recommendations and Recovery Steps

1. The district maintains a contract for providing annual first aid and CPR training for district and site staff. Attendance sheets of participants was available for the team’s review.
2. The district has recently made CPR certification a requirement of employment for both certificated and classified employees. New employees are given one year to obtain certification and current employees have been given two years to obtain certification. The district makes CPR training workshops available for employees on a regular basis. In the 2001-02 school year, the district offered 52 CPR training classes that were attended by 600 staff and community members.

2.1 Facility Planning – Maintenance of a Long-Range Facilities Master Plan

Professional Standard

Compton Unified School District should have a long-range school facilities master plan.

Consent Decree Stipulation

This standard was identified in the Consent Decree in the action *Serna v Eastin*, Case No. BC 174282, as needing to reach a rating of 8 to be deemed compliant.

Additional related stipulations (Section 25) include developing a comprehensive facilities plan with time lines, submitting the plan to FCMAT for approval, and FCMAT soliciting comments from plaintiff's counsel.

Progress on Recommendations and Recovery Steps

1. The district continues to meet this Consent Decree stipulation and standard. The board adopted a long-range Comprehensive Facilities Master Plan on July 13, 1999. The district completed a Facilities Implementation Plan which was approved by FCMAT effective August 10, 2001. The implementation plan provides a timeline to address the district's most pressing facilities needs and provides a priority for the modernization and new construction projects to be completed by the district as state funds become available.
2. All district facilities projects that are undertaken are based on the long-range Facilities Master Plan. Decisions about the use of the district's deferred maintenance funds are also being guided by the Plan. The district is currently using its deferred maintenance funds to address the safety needs identified in the Facilities Master Plan.
3. As reported in earlier six-month progress reports, the full implementation of the Facilities Master Plan will require state funds for modernization and new construction. The district had qualified to receive state financial hardship funds to support its share of the modernization (20%) and new construction (50%) match. All of the district's modernization and new construction projects have been approved by DSA and OPSC and await the availability of state funds. The district's projects have been placed on the waiting list of approved projects to be funded through state general obligation bond funds.
4. A workshop/meeting was conducted with the newly elected governing board in January 2002 to review the Facilities Master Plan and the Implementation Plan. The board has recommitted itself to implementing the Plan. The board has established committees in several district operational areas. The school board president chairs the committee for the facilities area. The board president, superintendent, a parent, a teacher and the site principal visit two campus sites each week to review the condition of the facilities.

5. The governing board has decided to place a General Obligation Bond (GOB) on the November ballot. The district has also approved a COP for \$19 million to build a new elementary school adjacent to Dominguez High School. The scheduled opening for the William Jefferson Clinton Elementary School is January 2003.

2.3 Facility Planning – Efforts to Seek State and Local Matching Funds

Professional Standard

Compton Unified School District should seek state and local funds.

Consent Decree Stipulation

This standard was identified in the Consent Decree in the action *Serna v Eastin*, Case No. BC 174282, as needing to reach a rating of 8 to be deemed compliant.

Progress on Recommendations and Recovery Steps

1. As reported in earlier six-month progress reports, the district continues to seek state funding for facilities improvement projects. The district received \$17 million in planning funds in 1999-2000 and is eligible to receive approximately \$135 million dollars for modernization and new construction projects. Currently, the state has no funds to support modernization and new construction projects. Future funding will be dependent on the success of the state to pass a general obligation bond in November 2002. The district has tried three times, unsuccessfully, to pass a general obligation bond in the past. The governing board has decided to place a district general obligation bond on the November ballot. The board has also approved a COP for \$19 million to build a new elementary school in the district.
2. The district has continued to submit applications to maintain its hardship eligibility status in order to receive 100% of state funding, instead of 80% for modernization projects and 50% for new construction. Districts would normally be required to provide a 20% match for modernization projects and a 50% match for new construction projects. All of the district's projects are on the list of approved projects awaiting state funds.
3. The district conducted a workshop/meeting on the Facilities Master Plan and Implementation Plan in January 2002 with the governing board. The board has recommit-
ted its support to the Facilities Master Plan and the Implementation Plan timelines and has been supportive of addressing facilities needs in the district. The board president, superintendent, a parent, a teacher, and the site principal continue to walk two cam-
puses each week to view the condition of the site facilities.

2.4 Facility Planning – Existence of a District Facility Planning Committee

Professional Standard

Compton Unified School District should have a facility planning committee.

Consent Decree Stipulation

This standard was identified in the Consent Decree in the action *Serna v Eastin*, Case No. BC 174282, as needing to reach a rating of 8 to be deemed compliant.

Progress on Recommendations and Recovery Steps

1. This standard has been met. As reported in earlier six-month progress reports, the district established a facilities master plan committee that included a wide representation of parents and community members to assist in the development of the district's facilities master plan. The committee remained active to address other district facilities concerns, such as assisting the district with asset mapping, decisions about school walking distances, revising school attendance boundaries, and the placement of portable classrooms at school sites.
2. The committee conducted its work in three phases. Phase one identified the district's building assets; phase two established school walking distances and revised school attendance boundaries; phase three planned for the opening of a new elementary school. Because of lack of state funds for new construction, the opening of this school was postponed. The district board has now approved a \$19 million COP to construct this school as student enrollment compelled the district to take action to alleviate overcrowding.
3. The district has convened a new facilities planning committee to continue to advise the district as it implements the Facilities Master Plan and moves forward on various facilities projects. The committee is active and has held several meetings. The committee has been active in the discussion of the COP for the new elementary school, and will be active in the work to pass a district general obligation bond. Copies of meeting agendas and the current list of committee members were shared with the study team. The committee's meetings are open to the community. The district should seek additional parents and community members to serve on the committee.

2.5 Facility Planning – Properly Staffed and Funded Facility Planning Function

Professional Standard

Compton Unified School District should have a properly staffed and funded facility planning department.

Consent Decree Stipulation

This standard was identified in the Consent Decree in the action *Serna v Eastin*, Case No. BC 174282, as needing to reach a rating of 8 to be deemed compliant.

Progress on Recommendations and Recovery Steps

1. The position of Chief Facilities Officer has been upgraded to a cabinet level management position. Two years ago, staffing for the Division of Facilities Planning and Maintenance was increased to include four additional positions in the trade areas. A facilities coordinator position will be filled in fall 2002. The district also hires construction management firms as project managers to oversee and assist in the completion of the district's construction projects.
2. As reported in earlier progress reports, the district administration has followed through on initial recovery plan recommendations to evaluate existing staff, resulting in the release of several employees. Qualified employees were placed in vacated positions. Electricians, for example, are now licensed. With the increased scrutiny of campus site inspections, employee performance accountability is stressed, and classified employees are being evaluated more regularly. Maintenance is monitoring the quality and experience of its staff and provides numerous training opportunities for staff to improve their job skills.
3. The evaluation of plant managers and plant maintenance staff is being shifted from the site principals to the Chief Facilities Officer and his designee(s). The district administration feels that this supervisory change will increase the accountability of site staff. The study team will review this change with the district staff during the next six-month visit.
4. The district facilities staff feel that they have a good team, that they are keeping abreast of projects, and that they are receiving and providing appropriate staff training. Staff are being recognized for their accomplishments.
5. The Chief Facilities Officer indicated that the facilities budget during the last school year was approximately \$30 million.

2.6 Facility Planning – Implementation of an Annual Capital Planning Budget

Professional Standard

Compton Unified School District should develop and implement an annual capital planning budget.

Consent Decree Stipulation

This standard was identified in the Consent Decree in the action *Serna v Eastin*, Case No. BC 174282, as needing to reach a rating of 8 to be deemed compliant.

Progress on Recommendations and Recovery Steps

1. The district has allocated healthy annual budgets for facilities projects as this remains a continuing district priority. The budgeted funds are used to improve facilities that need immediate attention. Staff indicated that approximately \$10 million was spent on maintenance and construction in the 2000-2001 school year. The Chief Facilities Officer indicated that the facilities budget during the 2001-2002 school year was close to \$30 million.
2. The district completed a Facilities Implementation Plan, approved effective August 10, 2001, to implement the district's Comprehensive Facilities Master Plan adopted in July 1999. Although the implementation plan relies on the receipt of state funds to implement modernization and new construction projects, the plan also identifies sources of district general funds for capital improvement projects and deferred maintenance, and provides a priority for the completion of construction projects as funds are received. In the Plan, the district committed \$2 million to \$2.6 million for capital improvement projects per year, and \$835,000 as the district's annual match for deferred maintenance projects. The full implementation of the Plan will require state funding of the modernization and new construction projects that remain on the state list of approved projects awaiting funding.
3. The district received \$17 million in planning funds in 1999-2000 and is eligible to receive approximately \$135 million dollars for modernization and new construction projects. Currently, the state has no funds for modernization and new construction projects. Future state funding will be dependent on the success of the state to pass a general obligation bond in November 2002. The district has tried three times, unsuccessfully, to pass a district general obligation bond in the past. The governing board has decided to attempt another district GOB in November 2002. The board also approved a COP for \$19 million to build a new elementary school.
4. The district has continued to submit applications to maintain its hardship eligibility status in order to receive 100% of state funding, instead of 80% for modernization projects and 50% for new construction. Districts would normally be required to provide a 20% match for modernization projects and a 50% match for new construction projects. All of the district's projects are on the list of approved projects awaiting state funds.

3.1 Facilities Improvement and Modernization – Appropriate Use of the Deferred Maintenance Fund

Professional Standard

The district has a restricted deferred maintenance fund and those funds are expended for maintenance purposes only. The deferred maintenance fund should be a stand-alone fund reflecting the revenues and expenses for the major maintenance projects accomplished during the year.

Progress on Recommendations and Recovery Steps

1. All elements of the standard are fully implemented, are being sustained with high quality, are being refined, and have a process for ongoing evaluation. This standard has been sustained for three years.
2. The district has earmarked its deferred maintenance fund, both the district and state match, to the completion of the Facilities Implementation Plan over the next ten years.

3.2 Facilities Improvement and Modernization – Use of Deferred Maintenance Extreme Hardship Applications

Professional Standard

The Compton Unified School District has pursued State funding for deferred maintenance – critical hardship needs by filing applications through the Office of Public School Construction and the State Allocation Board. [State Allocation Board Regulation §1866]

Progress on Recommendations and Recovery Steps

1. The district has continued to renew its applications to remain eligible for the state’s critical hardship grants in order to receive 100% of state funding, instead of 80% for modernization projects and 50% for new construction. Districts would normally be required to provide a 20% match for modernization projects and a 50% match for new construction projects. All of the district’s projects are on the list of approved projects awaiting state funds.
2. As reported in the previous six-month progress report, all facilities managers have been trained on the various state facilities planning processes and required timelines, including the critical hardship eligibility and application process. The managers have attended a year-long training program offered by the University of California at Riverside and are now certified in Facilities Planning.
3. The district received state approval for its five-year \$95 million deferred maintenance plan.

3.4 Facilities Improvement and Modernization – Determination of Maximum Eligibility for State Funding

Professional Standard

The CUSD consistently reviews and monitors its eligibility for State funding so as to capitalize upon maximal funding opportunities.

Consent Decree Stipulation

This standard was identified in the Consent Decree in the action *Serna v Eastin*, Case No. BC 174282, as needing to reach a rating of 8 to be deemed compliant.

Progress on Recommendations and Recovery Steps

1. The district consistently reviews and monitors its eligibility for state funding. In the 2000-01 school year the district submitted new eligibility applications to the State Allocations Board: Form SB50-03 Eligibility Determination and Form SB50-04 Application for Funding. These documents were resubmitted to reflect increases in CBEDS enrollment and Special Education enrollment. The increased student enrollment provided an increase in funding eligibility.
2. The district has continued to submit applications to maintain its hardship eligibility status in order to receive 100% of state funding, instead of 80% for modernization projects and 50% for new construction. All of the district's projects are on the list of approved projects awaiting state funds. The district's continued hardship eligibility status was approved at the School Allocation Board meeting in December 2001.
3. All facilities managers have been trained on the various state facilities planning processes, application procedures and required timelines. The managers attended a year-long training program offered by the University of California at Riverside and are now certified in Facilities Planning.

3.8 Facilities Improvement and Modernization – Approval of Plans and Specifications Prior to Contract Award

Legal Standard

The CUSD obtains approval of plans and specifications from the Division of the State Architect and the Office of Public School Construction (when required) prior to the award of a contract to the lowest, responsible bidder. [EC 17263, 17267]

Consent Decree Stipulation

This standard was identified in the Consent Decree in the action *Serna v Eastin*, Case No. BC 174282, as needing to reach a rating of 8 to be deemed compliant.

Progress on Recommendations and Recovery Steps

1. This standard has been met. All of the district's modernization and new construction projects have received approval from the appropriate state agency. All 28 district modernization projects and 8 new construction projects have been approved by both California Department of Education (CDE) and the Department of the State Architect (DSA). When funds become available, the district will award a contract to the lowest, responsible bidder.
2. As state funds are currently not available to initiate the district's new construction projects, the district governing board has approved a COP for \$19 million to construct a new elementary school to alleviate overcrowding. The William Jefferson Elementary School is scheduled to open in January 2003.
3. The district has continued to renew its applications to remain eligible for the state's critical hardship grants in order to receive 100% of state funding, instead of 80% for modernization projects and 50% for new construction. Districts would normally be required to provide a 20% match for modernization projects and a 50% match for new construction projects. All of the district's projects are on the list of approved projects awaiting state funds. The district's continued hardship eligibility status was approved at the School Allocation Board meeting in December 2001.
4. All of the district's facilities managers have been trained on the various state facilities planning processes, application procedures and required timelines. The managers attended a year-long training program offered by the University of California at Riverside and are now certified in Facilities Planning.

3.10 Facilities Improvement and Modernization – Plan for Maintenance and Modernization Exists

Legal Standard

The CUSD maintains a plan for the maintenance and modernization of its facilities. [EC 17366]

Consent Decree Stipulation

This standard was identified in the Consent Decree in the action *Serna v Eastin*, Case No. BC 174282, as needing to reach a rating of 8 to be deemed compliant.

Additional related stipulations (Section 25) include developing a comprehensive facilities implementation plan with time lines, submitting the plan to FCMAT for approval, and FCMAT soliciting comments from plaintiff's counsel.

Progress on Recommendations and Recovery Steps

1. The district has met this standard and Consent Decree stipulation. As reported in earlier six-month progress reports, the district developed a Comprehensive Facilities Master Plan, adopted by the Board in July 1999. The district completed a Facilities Implementation Plan, approved by FCMAT effective August 10, 2001, to implement the district's Comprehensive Facilities Master Plan. Although the implementation plan relies on the receipt of state funds to implement modernization and new construction projects, the plan also identifies sources of district general funds for capital improvement projects and deferred maintenance, and provides a priority for the completion of construction projects as funds are received. The district has committed \$2 million to \$2.6 million for capital improvement projects per year, and \$835,000 as the district's annual match for deferred maintenance projects.
2. The district has allocated healthy annual budgets for facilities projects as this remains a continuing district priority. The budgeted funds are used to improve facilities that need immediate attention. Staff indicated that approximately \$10 million was spent on maintenance and construction during the 2000-2001 school year. Additional general funds were provided to the facilities budget for the 2001-2002 school year. The Chief Facilities Officer indicated that close to \$30 million was expended on facilities and maintenance during the year.
3. All district facilities projects that are being undertaken are based on the long-range Facilities Master Plan. Decisions about the use of the district's deferred maintenance funds are also being guided by the Plan. The district is currently using its deferred maintenance funds to address the safety needs identified in the Facilities Master Plan. District staff feel that they have addressed the work identified for year one in the Facilities Implementation Plan. Playground equipment has been replaced, lighting retrofitting has been completed at several schools, and 21 restrooms at Anderson, Bunch, Caldwell, Dickerson, and Kennedy school sites have been renovated.

3.13 Facilities Improvement and Modernization – Knowledge of Office of Public School Construction Procedures

Professional Standard

Staff within the Compton Unified School District is knowledgeable of procedures within the Office of Public School Construction (OPSC).

Progress on Recommendations and Recovery Steps

1. All facilities division managers have been trained on the various state facilities planning processes, application procedures and required timelines. Four managers attended a year-long training program offered by the University of California at Riverside and are now certified in Facilities Planning. They are knowledgeable of the procedures to follow to obtain project approval from the Office of Public School Construction.
2. District managers continue to participate in training. They attended the annual CASH conference this last year.

4.3 Construction of Projects –Appropriate Project Records and Drawings are Maintained

Professional Standard

The Compton Unified School District maintains appropriate project records and drawings.

Progress on Recommendations and Recovery Steps

1. The district’s construction projects are tracked and monitored. The Facilities Division holds monthly meetings with the superintendent to inform the administration of the status of the district’s construction projects.
2. The district’s construction projects are tied to the district’s Facilities Master Plan. The district has used deferred maintenance funds to address the most pressing facilities needs to maintain health and safety.
3. As reported in an earlier progress report, the district has contracted with Mammoth Blueprinting to store district plans and to reproduce blueprint plans as needed. This provides the district with a secure, off-site storage facility for its valuable plans and specifications.
4. All elements of the standard are fully and substantially implemented and are sustainable.

5.4 Compliance with Public Contracting Laws and Procedures – Development of Biddable Plans and Specifications

Professional Standard

The CUSD ensures that biddable plans and specifications are developed through its licensed architects/engineers for respective construction projects.

Progress on Recommendations and Recovery Steps

1. The district has just bid the construction of the first new elementary school in the district in 35 years. The district has approved plans and specifications for new construction and all modernization projects identified in the Facilities Master Plan. The governing board approved a Certificate of Participation (COP) for \$19 million for the construction of the school. The William Jefferson Clinton Elementary School is scheduled to be open for students in January 2003.
2. All elements of the standard are fully and substantially implemented and are sustainable.

6.2 Special Education Facilities – Equity, Appropriate to Educational Program

Professional Standard

The CUSD provides facilities for its Special Education programs which ensure equity with other educational programs within the district and provides appropriate learning environments in relation to educational program needs.

Consent Decree Stipulation

This standard was identified in the Consent Decree in the action *Serna v Eastin*, Case No. BC 174282, as needing to reach a rating of 8 to be deemed compliant.

Progress on Recommendations and Recovery Steps

1. As reported in earlier six-month progress reports, the district conducted a facilities inventory/assessment to determine the space allocation for special education programs. The district relocated some special education programs to more appropriate locations, i.e., Walton Elementary. The district has addressed special education facilities at various sites with some facilities adjustments such as providing newer portables at Compton and Centennial High Schools for the special education classes.
2. The district reports that all school sites are handicapped accessible. The modernized facility in the Compton High School administration building's basement is handicapped accessible with ramps and an elevator. During the previous six-month visit, the district reported that a new facility was being designed for Caldwell Elementary for students with severe disabilities from the county special education program. The project application and plans are with the Division of State Architect for approval.
3. The Facilities Division considers maintenance requests to meet the needs of the special education population a high priority. Site principals are expected to consider the needs of their students when assigning the various instructional programs to existing site facilities and classrooms. Classrooms assigned for special education students, for example, might be located close to transportation drop off locations to accommodate students. The district's planned modernization projects should provide more appropriate facilities for all district programs, including special education. Modernization and new construction projects are designed to provide full access for handicapped students.

6.3 Special Education Facilities – Adequacy for Instructional Program Needs

Professional Standard

The CUSD provides facilities for its Special Education programs which provide appropriate learning environments in relation to educational program needs.

Consent Decree Stipulation

This standard was identified in the Consent Decree in the action *Serna v Eastin*, Case No. BC 174282, as needing to reach a rating of 8 to be deemed compliant.

Progress on Recommendations and Recovery Steps

1. As reported in earlier six-month progress reports, the district conducted a facilities inventory/assessment to determine the space allocation for special education programs. The district relocated some special education programs to more appropriate locations, i.e., Walton Elementary. The district has addressed special education facilities at various sites with some facilities adjustments such as providing newer portables at Compton and Centennial High Schools for the special education classes.
2. The learning environments for special education students have been upgraded. Attention has been given to providing proper lighting and air conditioning for special education classrooms, and renovating the restrooms for ease of use by disabled students.
3. The district reports that all school sites are handicapped accessible. The modernized facility in the Compton High School administration building's basement is handicapped accessible with ramps and an elevator. During the previous six-month visit, the district reported that a new facility was being designed for Caldwell Elementary for students with severe disabilities from the county special education program. The project application and plans are with the Division of State Architect for approval.
4. The Facilities Division considers maintenance requests to meet the needs of the special education population a high priority. Site principals are expected to consider the needs of their students when assigning the various instructional programs to existing site facilities and classrooms. Classrooms assigned for special education students, for example, might be located close to transportation drop off locations to accommodate students. The district's planned modernization projects should provide more appropriate facilities for all district programs, including special education. 8.5 Facilities Maintenance and Custodial – Adequate Maintenance Records and Inventories

Professional Standard

Adequate maintenance records and reports are kept, including a complete inventory of supplies, materials, tools and equipment. All employees required to perform maintenance on school sites should be provided with adequate supplies, equipment and training to perform maintenance tasks in a timely and professional manner. Included in the training is how to inventory supplies and equipment and when to order or replenish them.

Consent Decree Stipulation

This standard was identified in the Consent Decree in the action *Serna v Eastin*, Case No. BC 174282, as needing to reach a rating of 8 to be deemed compliant.

Progress on Recommendations and Recovery Steps

1. The district continues to use the maintenance request flow chart and forms established to track all maintenance requests from the sites. The district continues to adhere to a five-day completion timeline to complete the requested maintenance. If a request is complex and will require more than two days to complete, the request is assigned to the facilities division as a project, and sites are informed that the five-day timeline cannot be met, with an explanation and scheduled date of completion. A Project Status Report on the project is maintained.
2. The utilization of the two mobile maintenance teams provides for better tracking of the supplies and tools needed for the work conducted at the school sites. The facilities division monitors purchases on several open purchase orders that are provided to the division. The maintenance department performs weekly, monthly, and annual material checks. Maintenance records were shared with the study team. The department reports that an adequate inventory of materials and equipment is maintained with the maintenance record procedure.
3. School site employees are provided with the supplies, materials and tools necessary to perform their work. Site custodial supplies budgets, currently being administered by the site principals, are expected to be returned to the maintenance department so that funds can be more efficiently expended.
4. The maintenance department provides training and regular staff meetings to keep staff informed and up-to-date. Weekly meetings of plant managers are conducted to provide training on district processes and procedures, and to improve job skills. Managers are expected to provide the training to site employees. Training has been provided to plant managers on maintaining equipment and equipment inventories.

8.6 Facilities Maintenance and Custodial – Procedures for Evaluation of Maintenance and Operations Staff

Professional Standard

Procedures are in place for evaluating the work quality of maintenance and operations staff. The quality of the work performed by the maintenance and operations staff should be evaluated on a regular basis using a board-adopted procedure which delineates the areas of evaluation and the types of work to be evaluated.

Consent Decree Stipulation

This standard was identified in the Consent Decree in the action *Serna v Eastin*, Case No. BC 174282, as needing to reach a rating of 8 to be deemed compliant.

Progress on Recommendations and Recovery Steps

1. Annual evaluations of all permanent employees in the Facilities Division are conducted. Employees have clear expectations for their work. Thorough evaluation and strong communication occur between the maintenance shops. Facilities administrators are conducting spot checks of the school sites and noting areas that need improvement. In Fall 2002, the district will be moving the supervision and evaluation of plant managers and staff from the site principal to the Chief Facilities Officer and his designee(s). The district feels that this will provide a consistent performance standard for all sites and increase accountability for work performed at the sites.
2. The district's personnel office provides ongoing training workshops for supervisory personnel in evaluation procedures and in properly documenting unsatisfactory performance of employees. Workshops include discussion on how to monitor an employee's performance, and stress meeting probationary evaluation deadlines.
3. Performance evaluations are conducted to assess the work quality of the staff. The updated evaluation form now includes a "quality of work" section. The probation period is being taken seriously by both supervisor and new employee, and new employees are being closely monitored. Facilities staff indicates that better results are evident in the quality of work performance of employees.
4. The facilities division has provided plant managers with a sample structured work schedule for site maintenance employees for each day and each week. A sample template has been developed for plant managers to modify for their individual site needs. This will assist the managers to more efficiently monitor work completion and quality of work performed.

8.8 Facilities Maintenance and Custodial – Availability of Custodial Supplies and Equipment

Professional Standard

Necessary supplies, tools and equipment for the proper care and cleaning of the school(s) are available to staff. Operational staff should be expected to keep the campuses clean. In order for the staff to meet these expectations, they must be provided with the necessary supplies, tools and equipment as well as the training associated with the proper use of such.

Consent Decree Stipulation

This standard was identified in the Consent Decree in the action *Serna v Eastin*, Case No. BC 174282, as needing to reach a rating of 8 to be deemed compliant.

Progress on Recommendations and Recovery Steps

1. Funds to provide the necessary supplies, tools and equipment for the care and cleaning of the school are allocated to the site by formula. The school's custodial budget is based on the number of plant workers assigned to the site. The number of custodial staff at a school is allocated by formula based on the number of students at the site at a ratio of approximately 200:1. In addition, funds are allocated to the district's facilities budget to replace equipment and tools at the site and to address additional supply needs. Equipment for the sites is purchased by the maintenance department.
2. Custodial supplies are maintained in the district warehouse and are available to the sites as needed. School site employees are being provided the supplies, materials and tools necessary to perform their work. Oversight of the site custodial supplies budgets is expected to be moved from the site principals to the facilities division so that funds are more efficiently expended.
3. Continuous training and staff meetings are held to keep staff informed and up-to-date. Weekly meetings of plant managers are conducted to provide training on district processes and procedures, and to improve job skills. Managers are expected to provide the training to site employees.
4. Monthly meetings continue to be held with both the principals and plant managers in attendance together to discuss site and facilities issues.

8.9 Facilities Maintenance and Custodial – Implementation of a Preventive Maintenance Program

Professional Standard

The district has an effective preventive maintenance program. The district should have a written preventive maintenance program that is scheduled and followed by the maintenance staff. This program should include verification of the completion of work by the supervisor of the maintenance staff.

Consent Decree Stipulation

This standard was identified in the Consent Decree in the action *Serna v Eastin*, Case No. BC 174282, as needing to reach a rating of 8 to be deemed compliant.

Progress on Recommendations and Recovery Steps

1. The district has become more proactive in its approach to addressing facilities needs. The district has taken steps to determine the life expectancies of its facilities, such as roofs, asphalt, painting, etc. and has developed a replacement schedule. The maintenance department has also scheduled regular maintenance for recurring projects such as tree trimming, checking heating and air conditioning systems, cleaning gutters and drains, boiler checks, etc. Summer maintenance projects are underway.
2. The district, with assistance from its architects, has developed maintenance specs for all electrical and mechanical work. These specs establish standards that help provide conservation efficiency. The specs are used in all repair and maintenance work conducted by the district. Lighting fixtures are being upgraded.
3. The two mobile maintenance teams address maintenance requests before they become major problems. The teams have been established to do routine maintenance at school sites. They are scheduled on a rotational basis to a school site for approximately 7-10 days at a time. Sites are inspected ahead of the time the mobile team is scheduled to arrive to identify specific site needs. The mobile maintenance team lead also holds a meeting with the principal and plant manager upon arrival at the site. The rotational schedules of the teams are sometimes interrupted to address emergencies, or any site inspection deficiencies that surface in an ACLU inspection.
4. The district has established a maintenance request flow chart and forms to track all maintenance requests from the sites. The district has established a five-day completion timeline to complete the requested maintenance. If a request is complex and will require more than two days to complete, the request is assigned to the facilities division as a project, and sites are informed that the five-day timeline cannot be met, with an explanation and scheduled date of completion. A Project Status Report on the project is maintained.
5. All maintenance requests from the sites are tracked and monitored. Communication between the maintenance department and the sites has improved, and sites receive timely information as to the status or disposition of their work requests.

6. Monthly meetings are held with the site principals and plant managers in attendance together. Weekly training meetings are held with plant managers to provide continual training on safety procedures, ways of improving work performance, and expectations on complying with district processes and procedures.
7. The facilities division may find it useful to develop a handbook that summarizes its planned maintenance processes and procedures to document and institutionalize the processes for future district administrators and staff.

8.10 Facilities Maintenance and Custodial – Adequate Repair and Supervision of School Buildings

Legal Standard

The governing board shall keep the school buildings in repair and supervised. [EC 17593]

Consent Decree Stipulation

This standard was identified in the Consent Decree in the action *Serna v Eastin*, Case No. BC 174282, as needing to reach a rating of 8 to be deemed compliant.

An additional related stipulation (Section 17) includes that drinking water will be readily available to all students.

Progress on Recommendations and Recovery Steps

1. The governing board, elected in November 2001, has been supportive of the district's actions to address the facilities needs of the district. At a workshop/meeting in January 2002, staff reviewed the district's Facilities Master Plan and the Implementation Plan (timeline for completion). The board members, who were not board members when the Master Plan or Implementation Plan were developed, were supportive of the Facilities Master Plan and committed themselves to its completion. The board has established committees to work with district staff in several district operational areas. The board president chairs the facilities operational area and conducts school site visitations each week with the superintendent, a teacher, a parent and the site principal to review the site's facilities. Board members have also participated with FCMAT and the ACLU in random site inspections.
2. The ongoing, random, unannounced site inspections keep staff focused on campus cleanliness and the safe condition of school site facilities. Staff acknowledge that the FCMAT/ACLU inspections have had a direct impact in this area. The district intends to hire a new facilities coordinator in the fall. Part of this coordinator's responsibility will be to inspect school sites using the FCMAT criteria checklist in order to make the inspections currently performed by FCMAT a regular district operational responsibility. The district can then take immediate remedial action to address any potential hazards or issues of non-compliance. FCMAT welcomes the institutionalization of this process.
3. A FCMAT representative currently continues to visit the sites and uses an inspection checklist to monitor compliance with Consent Decree stipulations. Follow-up exit conferences are held with the site administrators. Schools are given a letter grade at least once per quarter based on the monitoring checklist. The condition of student drinking fountains is checked during monthly site inspections. Inoperable fountains are reported to maintenance staff for correction.

4. Facilities deficiencies identified during site inspections are shared with the facilities division for remedy. A written report of action taken is sent to the site principal and the FCMAT inspector for a follow-up visit. Mobile maintenance teams address any checklist deficiency right away. Repair work on site facilities is continuous. When the new facilities coordinator assumes responsibility for these site inspections, remedial actions should be more immediate and performance evaluations of staff directly affected.

8.12 Facilities Maintenance and Custodial – Implementation of a Planned Program Maintenance System

Professional Standard

The district has implemented a planned program maintenance system. The district should have a written planned program maintenance system that includes an inventory of all facilities and equipment that will require maintenance and replacement. This program should include purchase prices, anticipated life expectancies, anticipated replacement time lines and budgetary resources necessary to maintain the facilities.

Consent Decree Stipulation

This standard was identified in the Consent Decree in the action *Serna v Eastin*, Case No. BC 174282, as needing to reach a rating of 8 to be deemed compliant.

Progress on Recommendations and Recovery Steps

1. As indicated in Standard 8.9, the district has become more proactive in maintaining its facilities and equipment, determining the life expectancies for its roofs, asphalt, painting, equipment, etc. and including these in a replacement schedule. The maintenance department has also scheduled a regular maintenance schedule for recurring projects such as tree trimming, checking heating and air conditioning systems, cleaning gutters and drains, boiler checks, etc. Summer maintenance projects are underway.
2. The facilities division continues to use a computer software program to maintain a database of its maintenance equipment inventory. The projected life expectancy of the equipment is included to determine a schedule of maintenance and replacement of items.
3. The district, with assistance from its architects, has developed maintenance specs for all electrical and mechanical work. These specs establish standards that help provide conservation efficiency. The specs are used in all repair and maintenance work conducted by the district.
4. Two mobile maintenance teams address maintenance requests before they become major problems. The teams do routine maintenance at school sites. They are scheduled on a rotational basis to a school site for approximately 7-10 days at a time. Sites are inspected ahead of the time the mobile team is scheduled to arrive to identify specific site needs. The mobile maintenance team lead also holds a meeting with the principal and plant manager upon arrival at the site. The rotational schedules of the teams are sometimes interrupted to address emergencies, or any site inspection deficiencies that surface in an ACLU inspection.
5. The district has a Comprehensive Facilities Master Plan which was adopted by the Board in July 1999. The district completed a Facilities Implementation Plan, approved by FCMAT effective August 10, 2001. Although the implementation plan

relies on the receipt of state funds to implement modernization and new construction projects, the plan also identifies sources of district general funds for capital improvement projects and deferred maintenance, and provides a priority for the completion of construction projects as funds are received. The district is currently using deferred maintenance and budgeted general fund monies to address health and safety facilities needs.

6. The facilities division may find it useful to develop a handbook that summarizes its planned maintenance processes and procedures to document and institutionalize the processes for future district administrators and staff.

9.3 Instructional Program Issues – Lunch Areas are Warm, Healthful and Safe

Legal Standard

The governing board shall provide a warm, healthful place in which children who bring their own lunches to school may eat their lunch. [EC 17573, CCR Title 5 §14030]

Consent Decree Stipulation

This standard was identified in the Consent Decree in the action *Serna v Eastin*, Case No. BC 174282, as needing to reach a rating of 8 to be deemed compliant.

An additional related stipulation (Section 21) includes that any inspections conducted by the LA County Health Department should be shared with the school site committee.

Progress on Recommendations and Recovery Steps

1. The district completed its feasibility study for a central district kitchen, referenced in the master plan, to serve all district schools. The district applied to the Department of Agriculture for a waiver to use the surplus funds in the Food Services reserve accounts, earmarked for equipment, to build the central kitchen. The waiver, however, was not granted. The governing board has decided to not implement the central kitchen project, and instead, to upgrade and remodel five existing cafeterias to make them more attractive and increase student lunch participation. The board has approved a proposal from Universal Seating to remodel five school cafeterias at a cost of \$250,000 per site before schools open in September. The five sites are the three high schools and Roosevelt and Whaley Middle Schools. The remodeling designs were shared with the study team. The remodeling addresses seating arrangements, lunch flow patterns, and provides attractive artwork related to school themes and/or school mascots.
2. High schools have been equipped with four outdoor kiosks at each site to provide for lunch vendors (working with food services) to provide a variety of lunch options for students, in addition to the cafeteria lunch. Colorfully painted trash barrels with hoops on the top of them have been placed in the lunch courtyards to encourage students to throw their trash through the hoops into the trash cans. Outdoor benches have been made available to students. Heating is provided to all cafeterias.
3. Shade structures to enhance the outdoor lunch areas have been erected at Roosevelt Elementary and Roosevelt Middle Schools. Attractive, new marquis messaging boards have been installed at the three high schools to announce upcoming school activities.
4. The district adopted a Comprehensive Facilities Master Plan in July 1999. All district facilities projects being undertaken are based on this long-range master plan. The district anticipates that completion of its 28 approved modernization projects and three new construction projects will provide modernized school lunch rooms and other areas of campus for students to enjoy their lunches.

5. The inspections of the various site cafeterias by the Los Angeles County Health Department for the 2000-01 school year were shared with the school site councils in fall 2001.

9.4 Instructional Program Issues – Bathroom Facilities are Clean and Operable

Legal Standard

The governing board of every school district shall provide clean and operable flush toilets for the use of pupils. [EC 17576; CCR Title 5 §14030]

Consent Decree Stipulation

This standard was identified in the Consent Decree in the action *Serna v Eastin*, Case No. BC 174282, as needing to reach a rating of 8 to be deemed compliant.

Additional related stipulations (Section 7) include that all bathrooms used by children are safe, sanitary and operable, regularly cleaned and stocked with supplies, and accessible when school is in session; principals are to inspect bathrooms prior to the start of school, prior to and after the lunch period, and are to take corrective action; principals will maintain daily inspection records on a form developed by the State Administrator and make them available for public inspection.

Progress on Recommendations and Recovery Steps

1. Over the last two years, the district has renovated restroom facilities at a number of schools. Last school year, fourteen restroom renovation projects were completed at Compton High School, and Bunch, Willowbrook and Washington Elementary Schools. The board approved \$660,000 for renovations of an additional 21 restrooms this school year.
2. The maintenance department continues the use of an emergency hot line for sites to call for emergency services from the district. The maintenance department considers a non-functioning toilet an emergency. The maintenance department has set goals for response times for the central office maintenance staff. For example, maintenance staff is expected to respond to an emergency call in 15 minutes, and complete repairs to a non-functioning toilet within 24 hours. The maintenance department is tracking the number and types of emergency and non-emergency calls it receives.
3. Four restroom monitors have been assigned to each high school during the last school year to monitor the restrooms throughout the school day. The monitors have helped to insure restroom cleanliness and have improved the security and safety of students during their visits to the restrooms. The monitoring of the restrooms by full-time monitors has worked so well, the district may expand the use of restroom monitors to other campuses if funds allow.
4. Staff indicates that although the general condition of campus restrooms always need improvement, toilet facilities are operable. As the district has not received modernization funds to modernize the restrooms, the district is upgrading restroom facilities as deferred maintenance and general fund monies allow.

5. All site restrooms continue to be inspected a minimum of three times daily by the principal and/or other staff. Records of this monitoring process are maintained at the site for inspection.

6. The condition of school site facilities continues to be monitored during periodic, unannounced site visits to school campuses. A FCMAT representative uses an inspection checklist to monitor compliance with Consent Decree stipulations. All written documents and logs are reviewed. Follow-up exit conferences are held with the site administrators. Schools are given a letter grade at least once per quarter based on the monitoring checklist. Student restrooms are inspected during every campus visit.

9.7 Instructional Program Issues – Adequate Heating and Ventilation Exists in All Schools

Professional Standard

All schools shall have adequate heating and ventilation.

Consent Decree Stipulation

This standard was identified in the Consent Decree in the action *Serna v Eastin*, Case No. BC 174282, as needing to reach a rating of 8 to be deemed compliant.

Progress on Recommendations and Recovery Steps

1. The district is continually working on updating or replacing its heating units and ventilation systems. Maintenance request logs were provided for the FCMAT study team's review. The district has replaced several heating units in the schools during the last year. The Facilities Division estimates that during the last school year, 90-95% of all heating units were operable during the winter months and that the heating unit problems that arose in the remaining 5-10% were speedily addressed. New heaters were installed at Davis, Centennial, Anderson, and Lincoln schools. Ventilation systems have been checked and filters changed. Classroom fans are made available to staff and students if a problem with the air conditioning occurs, until the problem is resolved.
2. The district's modernization and new construction plans address heating and ventilation for the district schools. HVAC and lighting/electrical systems are included in the scope of the projects contained within the plans. However, since the state has no funds to support school modernization projects, the district has utilized its deferred maintenance funds to address heating and electrical repairs.
3. As reported in a previous six-month progress report, the district has worked with ENVIRON to assess ways to increase energy efficiency in the district. ENVIRON visited the various school sites, assisted the district in analyzing its utility bills and patterns of energy consumption, and made recommendations to the district for future energy savings. The company recommended the reduction of the number of dissimilar systems utilized in the district which required varied maintenance services. The district has defined district standards for unit brands and types of systems to standardize maintenance and replacement component issues.
4. All district modernization and new construction projects identified in the Facilities Master Plan address energy conservation in proposed equipment, infrastructure, and construction. The Facilities Division, along with the district's architects, has developed master specs for the installation of all electrical and mechanical equipment.

9.8 Instructional Program Issues – Adequate Lighting and Electrical Service is Provided

Professional Standard

All schools shall have adequate lighting and electrical service.

Consent Decree Stipulation

This standard was identified in the Consent Decree in the action *Serna v Eastin*, Case No. BC 174282, as needing to reach a rating of 8 to be deemed compliant.

Additional related stipulations (Section 10) include monthly inspections by the district with written records of these monthly inspections maintained, the inspection before September 1, 1999, by a licensed electrical inspector of sites identified by plaintiff's counsel and a copy of the report delivered to counsel for plaintiffs and available for public inspection, the correction of any electrical problems.

Progress on Recommendations and Recovery Steps

1. The district's modernization and new construction plans address lighting and heating for the district schools. HVAC and lighting/electrical systems are included in the scope of the projects contained within the plans. However, since the district has received no funds for its school modernization projects, the district has been utilizing its deferred maintenance and general fund monies to address heating and electrical repairs. The district's five-year \$95 million deferred maintenance plan was approved by the state.
2. A retrofit of lights has taken place at Davis Middle School, Roosevelt Middle School, Emerson Elementary and Vanguard Middle School. The district has used deferred maintenance funds to provide these needed repairs, setting aside \$470,000 to retrofit lights at seven school sites. The district's modernization projects will continue to address this standard when state funds are provided.
3. The mobile repair teams are assigned to school sites on a rotational basis and replace lights and light fixtures as needed. The site staff monitors the lighting fixtures and reports fixtures that need repair.
4. The Facilities Division, along with the district's architects, developed master specs for the installation of all electrical and mechanical equipment.
5. In response to the Consent Decree stipulation, the district and plaintiff's counsel selected a licensed electrician to conduct site inspections of specific identified sites during the 2000-2001 school year. Inspections were conducted at Compton High School and Centennial High School during late Fall 2000. An electrical inspection of Dominguez High School was conducted in May 2001. The district's Facilities Division addressed the deficiencies identified during the electrical inspections. The district has two licensed electricians on staff.

6. Site plant managers have been directed to conduct electrical inspections of their site on a monthly basis and to report in writing, any potentially hazardous electrical condition. Electrical hazards are considered an emergency condition that should be reported through the emergency hot line for immediate response. Electrical hazards are considered a priority concern and corrected as soon as possible. A form for the documentation of the monthly reviews was developed, and records of the monthly reports from the sites are being maintained. Follow-up work conducted on any reported electrical condition is tracked for each site. Records of these reports were shared with the study team. The electrical inspection form from the site is due to the district office by the fifth of each month.

9.10 Instructional Program Issues – Environment Conducive to High Quality Teaching Learning

Professional Standard

The learning environments provided within respective school sites within the CUSD are conducive to high quality teaching and learning.

Consent Decree Stipulation

This standard was identified in the Consent Decree in the action *Serna v Eastin*, Case No. BC 174282, as needing to reach a rating of 8 to be deemed compliant.

Progress on Recommendations and Recovery Steps

1. The district is continually upgrading its facilities to improve the learning environment for students. Much thought is given to color schemes, the use of clear glass blocks for lighting, adequate sized walkways, etc. to make the learning environment more attractive.
2. The district has completed the infrastructure for placing computers in every classroom, and is constantly upgrading the networking system. Extra conduits have been installed at all sites. Internet access is increasing each year to additional classrooms. The district has wired the new portables that were added to the campuses this school year. The telephone system in the district has been upgraded. Telephones have been placed in classrooms districtwide. The district has continued to benefit from its e-rate applications over the last few years.
3. The district adopted a long-range, Comprehensive School Facilities Master Plan in July 1999. The district completed a Facilities Implementation Plan that provides a timeline for the construction projects for the next ten years and identifies sources of district and state funding to support the projects. All district facilities projects being undertaken are being driven by this long-range master plan. The district anticipates that completion of its 28 approved modernization projects and three new construction projects will improve the learning environment for students.
4. The condition of school site facilities continues to be monitored during periodic, unannounced site visits to school campuses. A FCMAT representative uses an inspection checklist to monitor compliance with Consent Decree stipulations. All written documents and logs are reviewed. Follow-up exit conferences are held with the site administrators. Schools are given a letter grade at least once per quarter based on the monitoring checklist. The district intends to hire a new facilities coordinator in the fall. Part of this coordinator's responsibility will be to inspect school sites using the FCMAT criteria checklist in order to make the inspections currently performed by FCMAT a regular district operational responsibility. The district can then take immediate remedial action to address any potential hazards or issues of non-compliance. FCMAT welcomes the institutionalization of this process.

9.11 Instructional Program Issues – Facilities Reflect Community Standards and Expectations

Professional Standard

Facilities within the CUSD reflect the standards and expectations established by the community.

Consent Decree Stipulation

This standard was identified in the Consent Decree in the action *Serna v Eastin*, Case No. BC 174282, as needing to reach a rating of 8 to be deemed compliant.

Additional related stipulations (Section 18) include establishing site committees to inventory and prioritize repair and maintenance needs, and reporting to the State Administrator and board at least once a semester.

Progress on Recommendations and Recovery Steps

1. The district continues to involve community members and parents in various facilities decisions. As reported in earlier six-month progress reports, the district involved a representative community committee in the development of the district's Comprehensive Facilities Master Plan. The plan, therefore, reflects the standards and expectations of the community for its school facilities. Several public meetings and hearings were conducted in addition to the committee's meetings, to solicit wider community input into the long-range facilities plan. The committee also provided input to the district on a number of operational decisions such as reviewing and revising school boundaries, and placement of portables on school campuses.
2. The Facilities Division has reconvened the district facilities committee which has been very active and has been holding regular meetings. The committee has been involved in the new elementary school project, will be involved in school boundary decisions affecting the new school, and will be active in promoting passage of the district's general obligation bond which will be placed on the November ballot.
3. The governing board has been responsive to the community, involving community members on various ad hoc committees, and encouraging community participation at board meetings. The board is considering adding a student member to the board.
4. The Comprehensive Facilities Master Plan and the Facilities Implementation Plan rely heavily on state funding to implement the many facilities projects. As the district has received no state funds for its modernization and new construction projects, the district continues to utilize its deferred maintenance and general fund monies to address as many of the district's most pressing facilities needs as possible.
5. The district continues to improve in its efforts to keep parents and the community informed of projects and improvements in the schools. This appears to be having a positive result, as facilities staff have indicated that parents and community members

have been reporting their appreciation to the district for the “drastic improvements” that have occurred in the district’s facilities. The facilities division has initiated a newsletter to update the community and staff on the status of facilities projects.

6. As reported in earlier progress reports, site safety committees have been established at each school site. The composition of the committees are specified in the consent decree stipulation, and should be composed largely of parents (60%). The committees are responsible for periodically inspecting their school sites and identifying repair and maintenance priorities. Copies of agendas and minutes are checked by a FCMAT representative during periodic, unannounced visits to the school sites.

10.1 Community Use of Facilities – Plan to Promote Community Involvement in Schools

Professional Standard

The district should have a plan to promote community involvement in schools.

Consent Decree Stipulations

Section 23 of the Consent Decree in the action *Serna v Eastin*, Case No. BC 174282, includes the following stipulations: the district is to develop a parent involvement plan, develop a form to record voluntarism, recruit parents to volunteer 40 hours per year, keep records of the number of volunteer hours at the schools, conduct monthly recognition programs and provide a certificate to the volunteer of the month.

Progress on Recommendations and Recovery Steps

1. The district has met this standard and Consent Decree stipulation as reported in earlier six-month reporting periods. The district continues to promote community involvement in its schools, and continues to implement the “Volunteers in Public Schools” (VIPS) guide. The VIPS handbook, developed in the 1999-2000 school year, provides direction to volunteers about becoming involved in the district schools. Schools continue to monitor volunteer participation and the number of parent volunteer hours with sign-in sheets that are monitored by district staff and a FCMAT representative. Training and workshops continue to be provided to parents and school volunteers. Each school has at least one or more parent coordinators to promote parent involvement and assist parents in volunteer activities.
2. Community input is regularly sought by the district. The district held a parent forum during the spring 2002 to hear parents’ concerns and suggestions for improving district programs and operations. The forum was very well attended, and the district intends to conduct these forums on a regular basis. In 2001, parents and community members were involved in the superintendent search process, serving on a community interview panel. Parents were surveyed in the district deliberations to expand kindergarten to a full-day program, which was implemented in September 2001.
3. The district continues to provide training workshops to its classified personnel, particularly front office staff, about providing “customer service” to parents and school visitors. Parent handbooks are updated at the beginning of the school year and distributed to students for their parents. The parent handbooks communicate information on school operations and district requirements to help parents understand the school system.
4. Parent centers are available at 14 of 34 school sites, and all schools have a designated area for parents to meet. Parent centers are included in the district’s Comprehensive Facilities Master Plan for all district schools as part of the planned modernization projects.

5. The district conducted a volunteer recognition dinner at the end of the 2001 school year to show its appreciation for the many outstanding parent and community volunteers who have worked with the schools. More than 70 volunteers, two from each school, were recognized. More than 250 people attended the event. The district held its 2002 volunteer recognition event on May 10, again recognizing two volunteers from each school. More than 150 people attended the event held in the board room. The district intends to make this an annual event and has already scheduled a date in May 2003.

6. As reported in earlier six-month progress reports, parent involvement is a major component of several grant programs awarded to the district. The Voluntary Desegregation grant, for example, requires a strong parent involvement program with documentation including parents' name, school, organization, etc. The Read Across America program requires each site to develop a plan to involve parents and community members as readers. The Immediate Intervention/ Underperforming Schools Program (II/USP) requires the involvement of community members and parents on the school action team that develops the school's Action Plan for implementation. The Title I program requires a parent involvement component to meet program compliance.

11.1 Communication – Communication of Facility Condition and Needs

Professional Standard

The district’s public information office should coordinate a full appraisal to students, staff and community of the condition of the district’s facilities.

Progress on Recommendations and Recovery Steps

1. The district continues to provide regular communiqués to the public. The public information office provides media releases about district and school events, produces information and educational programs through its television production studio, maintains an active web page, provides several thousand letters and mailers to homes of students, and responds to community and media complaints or requests for information.
2. The Facilities Division published its first newsletter, introducing the facilities staff and providing information on the status of the district’s various facilities projects. Copies were made available to the governing board and community members at a recent board meeting and to the school sites. The Division plans to produce additional newsletters to enhance communication with the public.
3. All elements of the standard are fully implemented, are being sustained with high quality, are being refined, and have a process for ongoing evaluation. This standard has been sustained for three years.

11.2 Communication – Communication of Actions Taken, Planned, Progress Made

Professional Standard

The district should apprise students, staff and community of efforts to rectify any substandard conditions.

Consent Decree Stipulations

Section 22 of the Consent Decree in the action *Serna v Eastin*, Case No. BC 174282, includes the following stipulations: the district is to establish a central telephone number for complaints about the condition of school facilities, distribute and post the telephone number for the public, develop a form for recording calls, record all calls on the developed form, prepare quarterly reports concerning the calls received at the school and district levels.

Progress on Recommendations and Recovery Steps

1. The district recognizes that the condition of the district's facilities continues to be an important issue for staff, students, parents, and community members. The district provides ongoing communication about the district's activities and positive achievements to its community. The governing board is supportive of addressing facilities needs, and has committed itself to the completion of the district's Facilities Master Plan.
2. The district is doing a better job of keeping parents and the community informed of projects and improvements in the schools. This appears to be having a positive result, as facilities staff have indicated that parents and community members have been reporting their appreciation to the district for the "drastic improvements" that have occurred in the district's facilities.
3. The district receives public complaints through the district's central telephone number, the public information office, the superintendent's office, or open board meetings. School complaints are generally referred to the site principal for resolution. Complaints about security issues are made to the Police Services department. Facilities complaints are made to school principals, board members or the superintendent.
4. The rating for this standard was decreased in the August 2000 progress report because the district had not established a central telephone number or publicized a telephone number for community members to call concerning facilities issues. The Facilities Division has now established an emergency hot line for the sites to report facilities emergencies. The district central telephone system directs public callers to the Facilities Division. The district's Police Services takes complaints or emergency calls from the community.
5. The district has also reestablished participation in the WE-TIP hot-line program, which provides a means for community members to anonymously report facilities concerns or problems to the district. The WE-TIP number was listed in the division's

recent newsletter. The district should ensure that the WE-TIP number is widely disseminated. The district also needs to record and tabulate the types of calls received and provide a quarterly report of this information to the board. In the past, the effectiveness of the WE-TIP program has been questionable. The district should monitor this program to ensure its effectiveness and utilization.
