Multiyear Projection & Cash Flow Software

For school districts, county offices, charter schools and oversight agencies

Exploring Projection-Pro

Join FCMAT for a hands-on experience using [Projection-Pro](#). Meet the experts who support the software, and learn how to create quality financial projections. These sessions are recommended for beginning users and intermediate/advanced users who would like a refresher. Hands-on activities will help attendees develop confidence in creating their next set of financial projections. New users interested in developing a multiyear cash flow are highly encouraged to attend both days.

The first day will cover all required and many optional components to create a complete multiyear projection — from importing the base year, to adding meaningful assumptions and notes, using the specialized screens, to analyzing the results.

The second day is dedicated to cash flow. Cash flow is a single screen and simple to use but is packed with functionality to make projections easier to create and maintain. Content will include creating a base year cash flow and multiyear cash flow.
